

NDNU Compliance with the Higher Education Opportunity Act (HEOA) Peer-to-Peer File Sharing Requirements

The Higher Education Opportunity Act (HEOA) of 2008 added provisions to the Higher Education Act of 1965 intended to reduce the illegal uploading and downloading of copyrighted works through Peer-to-Peer (P2P) file sharing.

What follows are the three primary requirements of HEOA related to this issue, and information regarding actions taken by Notre Dame de Namur University (NDNU) in order to demonstrate good faith in doing due diligence to comply with the HEOA regulations.

I. An annual disclosure to students describing copyright law and campus policies related to violating copyright law.

As stated in the NDNU Acceptable Use Agreement (AUP), Users of NDNU Computing Systems:

Shall not copy computer software, or other materials protected by copyright or trademark, from, into, or by NDNU computing facilities, except as permitted by law or by the contract with the owner of the copyright or trademark.

This includes, and not limited to, the illegal uploading and downloading of copyrighted works (music, movies, images, software, etc) through any illegal subscribed or unsubscribed P2P file sharing sites and/or locations.

In 1998, the U.S. Congress passed into law the Digital Millennium Copyright Act (DMCA). Since then, copyright owners and organizations such as the Recording Industry Association of America (RIAA) and Motion Picture Association of America (MPAA) have actively scanned the Internet to detect computers that are illegally sharing copyrighted files.

NDNU is considered an Internet Service Provider (ISP) for its students, faculty, and staff, and the DMCA requires NDNU to effectively respond to complaints it receives of copyright infringements.

Should NDNU receive a copyright infringement claim involving music, video, software, or other digital materials, Section F. Violations and Enforcement steps of the NDNU AUP will be followed.

NDNU sends an email to faculty, staff, and students early each fall and spring term outlining NDNU's strong stance against illegal file sharing and campus policies.

Flyers are posted in student computer labs and elsewhere to discourage illegal file sharing.

NDNU Office of Information Technology (OIT) staff are trained on copyright and illegal file-sharing issues, and this information is disseminated to OIT student workers.

For detailed information about copyright laws and legal consequences for violations, please see the <u>U.S.</u> Copyright Office.

II. A plan to "effectively combat the unauthorized distribution of copyrighted materials" by users of its network, including "the use of one or more technology-based deterrents".

NDNU combats the unauthorized distribution of copyrighted materials by the following methods:

NDNU utilizes a network traffic shaper to prioritize network traffic.

Ports of P2P applications known to be widely used for illegal file sharing are blocked on the NDNU Campus Firewall. Ports of P2P applications widely used for legal uses, such as gaming, are open.

III. A plan to "offer alternatives to illegal downloading".

Legal Downloading Sites

NDNU maintains a strong stance against illegal downloading and file sharing, and all members of the campus community are cautioned to use only legal sources of online digital content.

Educause, a nonprofit association whose mission is to advance higher education by promoting the intelligent use of information technology, maintains a comprehensive list of these legal resources.

Legal Sources of Online Content

Annual Review

The plan and policy outlined above to combat the unauthorized distribution of copyrighted materials will be reviewed annually by NDNU Senior Administration in order to assess its effectiveness and will be revised as necessary to remain in compliance.
